

PITTSBURGH PIPE

SINCE 1977

POSITIVE TRAIN CONTROL (PTC)

The Premier Provider of HDPE Products

Features/Services:

Positive Train Control (PTC) technology is designed to stop trains before human error causes any accidents. As part of the Rail Safety Improvement Act enacted in 2010, PTC was a large technical undertaking that required a new system with hundreds of thousands of components. These components needed to work with freight, commuter, and passenger railroads. From the very beginning of the PTC project, Pittsburgh Pipe has supplied the required HDPE products for most of the affected Class I railroads and Directional Drilling Contractors. Pittsburgh Pipe continues to ship communication and power HDPE products throughout the U.S. for all Class I and II railroads, and to help maintain PTC compliance.

About Pittsburgh Pipe

Since 1977, Pittsburgh Pipe has been America's supplier of pipes and construction materials for a wide range of industries. Our reputation for rigid quality standards, exceptional customer service, and industry knowledge has taken off with contractors across the country.

THE RIGHT PIPE. RIGHT ON TIME.
